

Ranvet's Neutrolene

PLUS

with added BUFFER SALTS and CHOLINE

PERFORMANCE/EXERCISE STRESS & RECOVERY

BODY ACID NEUTRALISER AND ALKALI RESERVE REPLACER

- NEUTROLENE PLUS (WITH ADDED BUFFER SALTS)
- NEUTROLENE PLUS WITH CHOLINE (ADDED BUFFER SALTS & CHOLINE)

ACTIVE CONSTITUENTS (PER L)

Sodium citrate dihydrate 236.42g, Citric acid 93.23g
Trometamol 1.08g (Neutrolene Plus), Choline 56.3g
(Neutrolene Plus with choline).

Features

- Specifically formulated for the equine athlete.
- Rapidly metabolised and absorbed.
- Neutralises excess lactic acid in blood and muscle.
- Aids in the treatment and prevention of dehydration, acidosis and myopathy/'tying up'.
- Balances blood pH for optimum performance.

Benefits

- Rapid utilisation and acid neutralisation improves recovery rate following strenuous exercise.
- Restores depleted reserves of the most common bodily alkali, sodium.
- Supplies adequate body alkalines to neutralise acid build-up.
- May be dosed immediately following hard work.
- Able to be used in conjunction with standard daily electrolyte supplementation of Ranvet Salkavite.

DIRECTIONS FOR USE/CONTRAINDICATIONS

Administer orally over the tongue or place liquid on dry feed.

IMPORTANT NOTE: Ideally, daily broad spectrum electrolyte supplementation should be practiced via the addition of Ranvet Salkavite to the ration. Additionally, horses coming into work produce greater amounts of lactic acid for a given workload and as fitness increases, the ability to buffer and cope with acid improves considerably.

**Neutrolene Plus; Identical to the formulation of NEUTROLENE, with added acid absorbing buffer salts (Trometamol, or Tris Buffer) used as an aid to treat heavily sweating horses with high body salt loss and as an aid to prevent and treat acidosis, dehydration and myopathy (Tying Up).*

**Neutrolene Plus with choline; Identical to the formulation of NEUTROLENE PLUS with the added benefit of choline for peak liver function, transmission of nerve impulses and the metabolism of fats.*

DOSAGE RATES

Routine use 45mL twice daily; Post-race 30mL additional to daily administration; As treatment in cases of metabolic disturbance 65mL twice daily.

PACK SIZE(S)

5L; 20L.
