

Ranvet's Salkavite

Vitamin B Group & Electrolyte Replacer for Horses

ELECTROLYTES/BODY TONICS/SALT LICKS

PREMIUM GRADE ELECTROLYTE AND B GROUP VITAMIN REPLACER.

ACTIVE CONSTITUENTS (PER KG)

Vitamin B1 3528mg, Vitamin B2 3434mg, Vitamin B6 199mg, Vitamin B12 14mg, Vitamin E 3604mg, Copper 510mg, Choline 7052mg, Folic acid 816mg, Inositol 8775mg, Calcium 99g, Magnesium 12180mg, Phosphorus 61.5g, Potassium 12007mg, Sodium 121g, Chloride 125.7g, Sulphate 43g, Bicarbonate 6867mg, Rutin 1766mg.

Features

- Supplies a concentrated source of all critical electrolytes.
- Provides B-Group Vitamins.
- Maintains optimal body fluid balance, nerve and muscle function.
- Supplies potent anti-oxidants essential to peak performance and recovery.
- Ideal for intense work, travelling, endurance or basic daily supplementation.
- May be used in conjunction with oral electrolyte pastes or liquids.
- Flexible use and daily supplementation as a feed or water additive or as a pre-saline drench.

Benefits

- Provides all essential elements necessary for efficient energy conversion from carbohydrates, proteins and fats.
- Rectifies B-Group Vitamin deficiencies, common in high grain/energy dense diets.
- Reduces dehydration, muscle fatigue, cramping, poor performance and delayed recovery following exercise.
- Reduces tissue damage and maintains cell integrity during strenuous work.
- Ideally used in conjunction with Ranvet Electro Paste during intense training or long distance travelling.
- Highly palatable powder.
- Easily mixed into the ration.

DIRECTIONS FOR USE/CONTRAINDICATIONS

Mix Ranvet Salkavite thoroughly through the feed. A measure is provided. One level measure holds 30g Salkavite. Alternatively, may be added to drinking water daily. Always ensure access to clean, fresh drinking water when using oral electrolyte supplements.

IMPORTANT NOTE:

- Salkavite used as a pre-saline drench; Mix 160g Salkavite in 2L of room temperature water and stomach tube as a pre-event saline drench.*
- The provision of adequate dietary roughage (hay) will aid the prevention of dehydration due to fibrous matter in the hindgut acting as a storage reservoir for water and electrolytes. Horses must receive 1% of body weight daily in roughage provision.*

DOSAGE RATES

Heavy work/endurance 30-60g daily (dependant on temperature, humidity, sweating rate), also advisable to supply an additional 30g Salkavite in evening feed following hard work; Travelling horses 60-90g prior to journey in addition to 30g in water during transportation; Stallions (during breeding season) 30g daily; Yearlings (sale preparations) 30g daily.

PACK SIZE(S)

2kg; 5kg; 16kg.
