

Ranvet's REHYDRA

ELECTROLYTES/BODY TONICS/SALT LICKS

ORAL REHYDRATION LIQUID CONCENTRATE FOR HORSES.

ACTIVE CONSTITUENTS (PER L)

Sodium ions 40.98g, Potassium ions 31.38g, Chloride ions 65.56g, Phosphate ions 23.94g, Magnesium ions 2.93g, Sulphate ions 11.95g, Glucose 260g.

Features

- Supplies a concentrated source of all critical electrolytes.
- Rapidly restores fluid and essential body salt levels depleted by strenuous exercise and sweat loss during training, racing, competition and travelling.
- Maintains optimal body fluid balance.
- Ideal for intense work or basic daily supplementation.
- Flexible use and daily supplementation as a feed or water additive or as a pre-saline drench.
- Added glucose for an energy boost.

Benefits

- Reduces dehydration, muscle fatigue, cramping, poor performance and delayed recovery following exercise.
- Ideal for travelling, endurance and dehydrated horses.
- Able to be used in conjunction with Ranvet Electro Paste during intense training or long distance travelling.
- May be used repeatedly on the same day.
- Stimulates the thirst mechanism to encourage drinking.
- Appropriate for all classes of horses.
- Convenient 1L bottle ideal for transportation.

DIRECTIONS FOR USE/CONTRAINDICATIONS

Light work 40mL daily; Moderate work 60mL daily; Heavy work 80mL daily.
Administer Ranvet Rehydra over the tongue or diluted in 2-3L of water as first drink.
Always ensure access to clean, fresh drinking water when using oral electrolyte supplements.

IMPORTANT NOTE: Rehydra may be administered via stomach tube at a rate of 40mL concentrate/L of room temperature water under veterinary supervision.

The provision of adequate dietary roughage (hay) will aid the prevention of dehydration due to fibrous matter in the hindgut acting as a storage reservoir for water and electrolytes. Horses must receive 1% of body weight daily in roughage provision.

DOSAGE RATES

Light work 40mL daily; Moderate work 60mL daily; Heavy work 80mL daily.

PACK SIZE(S)

1L; 5L; 20L.
