

# Ranvet's FLEXURE K9

MAY ASSIST IN IMPROVEMENT  
OF JOINT HEALTH AND  
FUNCTION IN DOGS

## JOINT CARE

**SUPPLEMENT TO ASSIST IN IMPROVEMENT OF JOINT HEALTH AND FUNCTION IN DOGS.**

### ACTIVE CONSTITUENTS (PER 5g SCOOP)

Glucosamine sulphate 1000mg, Chondroitin sulphate (shark cartilage) 800mg, Manganese (as manganese ascorbate) 2mg, Methyl-Sulfonyl-Methane (MSM) 50mg, Zinc Amino Acid complex 16.5mg, Copper Amino Acid complex 14mg, Vitamin E 1.15mg.

### Features

- Provides optimal levels of glucosamine sulphate, chondroitin sulphate and manganese ascorbate to assist in improving joint health and function.
- Contains natural, biological chondroprotective activators to stimulate regeneration of damaged cartilage tissues.
- Stimulates cartilage formation and repair.
- Promotes cartilage elasticity and resistance to compression.

### Benefits

- May be of assistance for the improvement of joint health and function associated with Osteoarthritis (OA), Degenerative Joint Disease (DJD) and articular inflammation.
- Prevents and minimises joint degeneration.
- Aids to increase joint movement and mobility.
- Highly palatable.

### DIRECTIONS FOR USE/CONTRAINDICATIONS

Mix Ranvet Flexure K9 thoroughly through feed. A measure is provided. One level measure holds 5g Flexure K9. Not recommended for use in acute or infectious joint conditions. Use with caution in pregnant and lactating bitches and in dogs with bleeding, liver or kidney disorders, as safe use in these groups has not been established.

**IMPORTANT NOTE:** Cartilage does not contain an active blood supply and subsequently, maintains structure and health by deriving nutrition from synovial fluid. It is therefore integral to provide the necessary building blocks of cartilage via dietary supply.

### DOSAGE RATES

5-10kg initial dose 2.5g (half scoop), maintenance dose 1.25g (one-quarter scoop);  
11-22kg initial dose 5g (one scoop), maintenance dose 2.5g (half scoop);  
23-44kg initial dose 7.5g (one and half scoops), maintenance dose 5g (one scoop);  
>45kg initial dose 10g (two scoops, maintenance dose 7.5g (one and half scoops);  
Dosage may be increased or decreased under veterinary advice.

### PACK SIZE(S)

400g (sufficient for one small dog for 160 days (treatment dose) - 320 days(maintenance dose) or one large dog for 53 days (treatment dose) - 80 days (maintenance dose).
