MAY ASSIST IN IMPROVEMENT OF JOINT HEALTH AND FUNCTION IN HORSES AND CAMELS

JOINT CARE

ORAL LIQUID SUPPLEMENT ASSISTING IMPROVEMENT IN JOINT HEALTH AND FUNCTION IN HORSES AND CAMELS.

ACTIVE CONSTITUENTS (PER L)

Glucosamine sulphate 180g, Chondroitin sulphate 15g, Methyl-Sulphonyl-Methane (MSM) 20g, Hyaluronic Acid 1.7g, Vitamin C (ascorbic acid) 5g.

Features

- Provides optimal levels of glucosamine sulphate, chondroitin sulphate and Methyl-Sulphonyl-Methane (MSM) to assist in improving joint health and function.
- Contains natural, biological chondroprotective activators to stimulate regeneration of damaged cartilage tissues.
- Stimulates cartilage formation and repair.
- Promotes cartilage elasticity and resistance to compression.
- Added Vitamin C for antioxidant provision and cell membrane protection.

Benefits

- Unique oral liquid supplement for daily use.
- May be of assistance for the improvement of joint health and function associated with Osteoarthritis (OA), Degenerative Joint Disease (DJD) and articular inflammation.
- Rapid incorporation into joint cartilage structures.
- Appropriate for supplementation addressing degeneration of joint cartilage due to a variety of circumstances such as direct trauma, structural abnormality of the joint, unbalanced loading, high impact performance, strenuous training and age-related deterioration.

DIRECTIONS FOR USE/CONTRAINDICATIONS

Administer orally over the tongue or place liquid on a dry feed. Best effect achieved when dose divided for twice daily administration and is recommended to be provided on a continuous basis in hard working or competition animals, or those with existing joint pathology. Not advisable to be fed to pregnant or lactating animals or in conjunction with phenylbutazone (bute), as clotting factors may be affected.

IMPORTANT NOTE: Cartilage does not contain an active blood supply and subsequently, maintains structure and health by deriving nutrition from synovial fluid. It is therefore integral to provide the necessary building blocks of cartilage via dietary supply.

DOSAGE RATES

Racehorses and camels in training maintenance dose 25mL daily; Treatment of joint conditions 50mL daily. Dosage may be increased or decreased under veterinary advice.

PACK SIZE(S)

1L (sufficient for one horse or camel for 20 days at 50mL daily); 5L (sufficient for one horse or camel for 100 days at 50mL daily); 20L (sufficient for four horses or camels for 100 days at 50mL daily).
