

Energy Plus

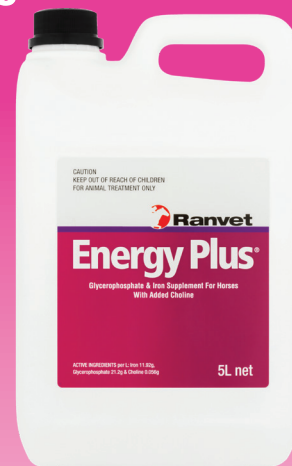

**Glycerophosphate & Iron Supplement For Horses
with added Choline**

ENERGY

GLYCEROPHOSPHATE & IRON SUPPLEMENT FOR HORSES WITH ADDED CHOLINE

KEY INGREDIENTS per L:

Iron 11.92g, Glycerophosphate 21.2g & Choline 0.056g

Features

- High energy glycerophosphate provision.
- Two readily assimilated and highly available iron salts.
- Added choline to meet the increased demands of liver stress in hard working horses.
- Highly palatable liquid for easily administered oral use.
- Rapidly replaces phosphate compounds which are necessary for muscle metabolism.
- Improves absorption rate of available iron into the blood stream.

Benefits

- Provides instantly available energy.
- Delays lactic acid accumulation and muscle fatigue.
- Improves endurance capacity.
- Maintains optimum red blood cell counts and maximises oxygen transfer.
- Improves iron absorption from the gut and aids liver function.
- Stimulates the appetite.
- Rapidly metabolised and absorbed.
- Increases iron absorption while simultaneously maintaining Vitamin E potency.

DIRECTIONS FOR USE

Mix Energy Plus thoroughly through the horse's feed. Continual use is recommended whilst horse is in training.

DOSAGE RATES:

Routine use 60mL daily (as two 30mL doses in separate feeds), Spelling horses use 60mL daily for the first 28 days then reduce to 30mL daily if horse is spelling for longer than 6 weeks.

PACK SIZE(S):

5L & 20L
